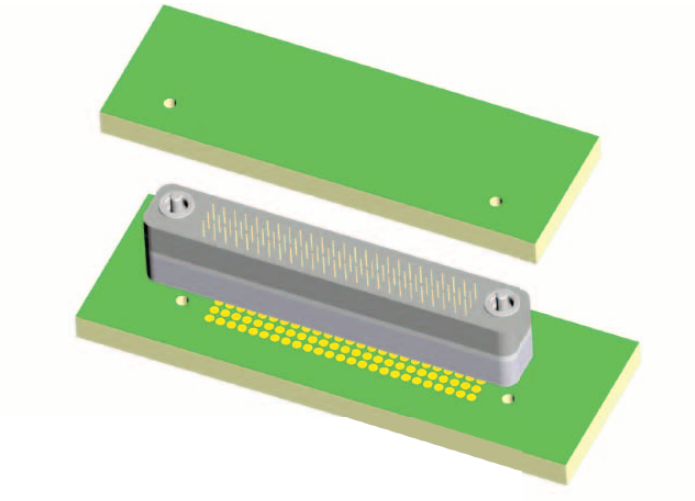
RZ™

The RZ family of high-density, board-to-board or flex circuit stacking applications is unique, offering users a reliable one-piece contact system. Its solder-less interconnect is compressed or "sandwiched" under pressure between parallel printed wiring boards or between a printed wiring board and other electronic components such as an IC or multichip module.

- **0.050" staggered grid array**
- **Up to 400 contacts per square inch**
- **BeCu contacts for reliable mating**
- **Standard heights from 0.100" to 0.350"**
- **Custom configurations available to meet your specific design needs.**



RZ™

Vertical Compression (Z-axis), Open-Pin Field

Contact spacing: 0.050" (1.27 mm)

A high-density, open-field, vertically-compressed connector utilizing a patented z-axis contact system configured for between-board (board-to-board) compression applications.
