

Amphenol Canada's M13 connector series is a range of filtered MIL-C-83513 Micro-D products for military and aerospace applications. These extremely small (0.050" center spacing) filter connectors employ monolithic planar capacitors in a rugged, high density package ideally suited for applications where space and weight is restricted. Available in a variety of filter types and mechanical configurations, including wired harnesses, the M13 series are fully intermateable with all standard MIL-C-83513 connectors and meet the applicable performance and environmental requirements.
